Work / Projects

chatbot resume builder

<https://github.com/sibuninja/resume-building-bot>

it is a flask-based ai chatbot app that builds resumes automatically with professional templates and exports them as pdfs.

ai chatbot with rag intergration

https://github.com/sibuninja/ai_agent_fastapi_groq_streamlit

developed a chatgpt-style ai assistant capable of answering user queries with context-aware and factual responses. implemented retrieval-augmented generation (rag) by integrating a vector database (faiss) with llms to ground responses on uploaded documents (pdf, txt).
